

EMC OPEN SOURCE SOFTWARE COMMITTER AGREEMENT FOR EMC PROJECTS LICENSED UNDER MPLv2.0

This Open Source Committer Agreement ("Agreement") is based on the Mozilla Foundation Committer's Agreement v2.1, and is used to make contributions to an EMC open source project licensed under the Mozilla Public License v2.0 ("MPLv2.0"). In order to become a Committer - that is, to obtain the ability to contribute source code, documentation, or other data ("Code") to a website, repository, or project operated or controlled by the EMC Corporation (an "EMC Project")- you ("You") must indicate your agreement to the terms below by completing and signing this Agreement and returning it to a EMC representative via one of the methods specified on an EMC Project's project page.

1. Submitting Contributions

You may contribute Code to an EMC Project by submitting the Code to an EMC representative specified on the EMC Project's project page. EMC and their designates may accept or reject your contributions at their sole discretion. Your name and email address, or a derivative of it, may be attached to your contributions and so be visible worldwide via the Internet.

2. License Terms

Code committed by You to an EMC Project, whether written by You or a third party, must be governed by MPLv2.0, or another license or set of licenses acceptable to EMC for the Code in question. Other licenses are not acceptable to EMC until EMC declares them to be acceptable in writing. You will verify that contributed Code contains appropriate boilerplate licensing text identifying the Code as licensed under MPLv2.0 or another license acceptable to EMC.

3. Notices and Knowledge

By contributing Code, You confirm that, to the best of Your knowledge, the Code does not violate the rights (including- right of title, intellectual property rights) of any person or entity.

If You contribute Code on behalf of Your employer, then You confirm that an appropriate representative of that employer has authorized the inclusion of such Code in an EMC Project under the terms of this agreement.

4. Committing Code Created by Others

You may contribute Code that was not written by You to an EMC Project, provided that:

- a) The contribution contains information (or references to information) sufficient to identify the author of the Code, the license of the Code, and the third-party public source code repository the code was taken from, if it came from such a repository; and
- b) You make all reasonable and appropriate efforts to ensure that such Code conforms to sections 2 and 3 of this agreement.
